DAYTON HI-FLY MULTI-ROOM WI-FI AUDIO

Hi-Fly™ Multi-Room Wi-Fi Audio Technology

Dayton Audio's Hi-Fly™ App turns your mobile device or tablet into a remote control for all Dayton Audio Hi-Fly™ enabled devices. Stream music from your favourite providers, or from your home network or directly from your mobile device. With Hi-Fly™ you can send music to individual speakers with individual user control, or "Group" any combination of speakers together for true Multi-room simultaneous audio. Plus, your music continues to play even if your phone is turned off or you need to take a call. The Dayton Audio Hi-Fly media streaming system is a top market solution that is a simple and convenient with an intuitive interface comfortable with any user.

• Control The Airwaves At Home with the Free H-Fly App for Apple or Android
• Music Uninterupted. Take a call or close Hi-Fly™ without any disruption to your music stream
• Enables Multi-room (same song, all rooms), Multi-channel (any song, any room) and Multi-user (any user, any room), for the ultimate in whole house audio
• Integrates directly with popular music streaming services for instant access. Save your favorite songs, playlists or preset radio stations. Hi-Fly™ does it all!
• Hi-Fly™ is free to download and allows you to stream music from any device as well as favorite providers including: TuneIn, iHeatrRADIO, Pandora, Spotify.

Your Current Sound System Redefined
The super-compact adapter is easy to set-up, connecting to your existing speaker system for quick, affordable whole-house audio.

Your Music. Your Way. Take Control
Let your audio listening experience soar with the new Hi-Fly™ multi-room Wi-Fi audio technology from Dayton Audio. With the Hi-Fly App, you can stream your favourite online music services, listen to music directly from your device, or play music stored on your home computer or the USB plugged directly into the back of the WFA02. The Dayton Audio WFA02 Wi-Fi audio adapter and MARK2-WF Wi-Fi speaker each work in harmony with the Hi-Fly App to provide the ultimate in affordable multi-room, multi-channel, and multi-user audio.

Super Simple Setup
Setting up the WFA02 adapter is simple, start by downloading the free Dayton Audio Hi-Fly™ App. Once the App is installed, open it on your mobile device or tablet and follow the step by step directions. If using a wired connection, the directions in the app are not required; just open the app and your device is ready for use.

Control the Airwaves at Home
The Dayton Audio Hi-Fly™ App turns your mobile device or tablet into a remote control for all Dayton Audio Hi-Fly™ enabled devices. Play music from your favourite streaming providers like Pandora and Spotify, or from your home network or mobile device. With Hi-Fly you can send music to individual WFA02 adapters, or group your Hi-Fly enabled systems together for true multi-room audio. Plus, your music continues to play even if your phone is turned off or you need to take a call.
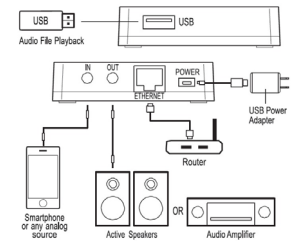

Hi-Fly™ is free to download and allows you to stream music from any network shared or DLNA/UPnP enabled device, including Airplay, as well as popular online media providers. Hi-Fly™ will stream-to Dayton Audio's Hi-Fly™ products only. For further feature descriptions, see the Hi-Fly™ manual.

EXCELLENT VALUE: The most affordable and feature-rich Wi-Fi speaker available today.

EASY TO USE: No wiring necessary and easily connects to existing Wi-Fi networks.

SOUND QUALITY: Fill your space with energetic sound complete with rich tones and deep bass.

Multi-room Sound has Never Been More Affordable
Easy to set-up on your Wi-Fi network and full of features, the Dayton Audio MARK2-WF Wi-Fi speaker produces room filling tones for a very reasonable price. Use the MARK2 by itself, as a pair for stereo left and right audio, or combine several speakers to create a feature-rich multi-room audio system. The MARK2 also includes Bluetooth and AUX in connection options for a truly versatile listening experience.

Stylish Looks Meet Audio Bliss
The retro looks of the MARK2-WF will make a statement while filling your room with full, rich tones. This powered speaker will add punch to rock music, mellow out with R&B, and put finesse into your favorite classical symphony. Full range sound is accomplished from the plethora of drivers including: Two 1" silk dome tweeters, two 2" midrange woofers, a 3-1/2" subwoofer, and a passive radiator for deep bass extension. Onboard dials and capacitive buttons such as volume, input method, track selection, Bluetooth and NFC pairing, and play/pause/phone answering give you control you need.

Your Music. Your Way. Take Control
Let your audio listening experience soar with the new Hi-Fly™ multi-room Wi-Fi audio technology from Dayton Audio. With the Hi-Fly App, you can stream your favorite online music services, listen to music directly from your device, or play music stored on your home computer. The Dayton Audio WFA02 Wi-Fi audio adapter and MARK2-WF Wi-Fi speaker each work in harmony with the Hi-Fly App to provide the ultimate in affordable multi-room, multi-channel, and multi-user audio.

Control the Airwaves at Home
The Dayton Audio Hi-Fly™ App turns your mobile device or tablet into a remote control for all Dayton Audio Hi-Fly™ enabled devices. Play music from your favorite streaming providers like Pandora and Spotify, or from your home network or mobile device. With Hi-Fly you can send music to individual MARK2-WF speakers, or group your Hi-Fly enabled systems together for true multi-room audio. Plus, your music continues to play even if your phone is turned off or you need to take a call.
